

表1 10株获选*Bt*菌株杀虫活性测定的校正死亡率

Table 1 The corrected mortality of the 10 candidate *Bt* strains

获选菌株 Candidate strains	重复数 Duplicates	试虫总数 Total of larva tested	实验组死亡虫数 The dead larval number of experimental group	对照组死亡虫数 The dead larval number of control group	校正死亡率 Corrected mortality (%)
S2685-1	3	30	29	2	90.00
S2737-3	3	30	30	1	96.67
S2796-2	3	30	30	0	100.00
S2809-1	3	30	26	1	83.33
S2852-1	3	30	26	0	86.67
S2852-2	3	30	24	0	80.00
S2852-3	3	30	22	0	73.33
S2852-4	3	30	29	1	93.33
S2852-5	3	30	30	0	100.00
S2853-1	3	30	30	0	100.00
HD-73	3	30	30	0	100.00

注: 校正死亡率=(获选菌株致死虫数—对照菌株致死虫数)/试虫总数×100%

Note: Corrected mortality=(the number of dead insects caused by candidate strains — the number of dead insects caused by standard strain)/total of larva tested
