

图3 EST-87 在四倍体花生及其二倍体祖先上的扩增子序列

注: EST-87 在祖先A 基因组上有两个拷贝,但在祖先B 基因组上只有一个拷贝,栽培种只保留祖先A 基因组上的两个拷贝;方框代表花生品种间的SNP

Figure 3 Amplicon sequence of EST-87 in *A. hypogaea* and putative diploid progenitor

Note: *A. duranensis* genome contained two copy of sequence“EST-87;”while *A. ipanensis* genome contained only one copy and only the copies from *A. duranensis* genome retained in *A. hypogaea* genome; SNP between peanut varieties is boxed
