

表 6 各样点浮游动物密度与生物量

Table 6 Density and biomass of zooplankton of the sample sites

| 样点<br>Sites       | 密度(个/升)<br>Density (ind./L) | 生物量(mg/L)<br>Biomass (mg/L) |
|-------------------|-----------------------------|-----------------------------|
| 入水口<br>Rushuikou  | 10.2                        | 5.9                         |
| 坝前<br>Baqian      | 22.8                        | 14.0                        |
| 库心<br>Kuxin       | 13                          | 7.8                         |
| 虎豹河<br>Hubaohe    | 1.2                         | 1.1                         |
| 陈河<br>Chenhe      | 6.6                         | 2.1                         |
| 陈家嘴<br>Chenjiazui | 1.2                         | 1.2                         |
| 庙沟口<br>Miaogoukou | 2.4                         | 1.8                         |
| 元潭子<br>Yuantanzi  | 1.0                         | 0.6                         |
| 清水河<br>Qingshuihe | 1.8                         | 1.7                         |
| 花饵坪<br>Huaerping  | 2.4                         | 2.7                         |
| 沙坝<br>Shaba       | 1.8                         | 2.1                         |
