

表 4 同时使用  $R_{SC-12}$  基因两侧分子标记的 MAS 符合率

Table 4 MAS efficiency when two markers flanking  $R_{SC-12}$  were co-used

| 群体<br>Population | Satt334-Sct_033         |       |       |                                   |    |      |
|------------------|-------------------------|-------|-------|-----------------------------------|----|------|
|                  | 抗病株数<br>No. of R plants | RR+Rr | R (%) | 感病株数<br>No. of susceptible plants | rr | S%   |
| F <sub>2</sub>   | 153                     | 153   | 100   | 51                                | 48 | 94.1 |
| F <sub>3</sub>   | 114                     | 114   | 100   | 64                                | 64 | 100  |
| F <sub>4</sub>   | 94                      | 94    | 100   | 49                                | 49 | 100  |
