

表 1 不同取材时间对流苏树根尖染色体制片的影响

Table 1 Effects of different material extraction time on *Chionanthus retusus* root tip chromosome preparation

取材时间	细胞观察情况
Sampling time	Observations on chromosome
9: 00~9: 30	多为分裂前期细胞, 处于分裂中期细胞约占 20% Mostly pre-dividing cells, approximately 20% of cells are in the mid-division stage
9: 30~10: 00	处于分裂期的细胞较多, 约占 20%~25% There are many cells in the middle division, about 20%~25%
10: 00~10: 30	处于分裂期的细胞数有所减少, 约占 12%~15% The number of cells in the division stage has decreased, accounting for about 12%~15%
10: 30~11: 00	处于分裂期细胞数约占 10%~16% Cells in the division stage accounts for about 10%~16%
