

表 3 *CRB* 在豆科 3 个物种中的直系同源候选基因

Table 3 The orthologous candidate genes of *CRB* in three species of legume

物种	基因名	基因号	是否全长	相似性	EST 证据
Species	Gene name	ID No of gene	If the gene was Full-Length	Similarity	Evidence of EST
百脉根	<i>LjCRB</i>	chr1_CM0206_290_nc	Yes	82.8%	F
<i>Lotus japonicas</i>					
大豆	<i>GmCRB1</i>	Glyma03g38930	Yes	83.0%	F
<i>Glycine max</i>	<i>GmCRB2</i>	Glyma19g41540	Yes	83.0%	F

注: F 代表整个候选基因有 PUT 序列覆盖, 或者两端有 PUT 序列覆盖并且整个基因 80% 的序列被 PUT 序列覆盖

Note: F: The whole candidate gene was covered by PUT sequence, or at both ends were covered by PUT sequence and the 80% of whole gene was covered by PUT sequence
